Thursday, November 14, 2024

- Today was my demo day for input voltmeter.
- It was good but I was not able to answer one small question about what happens if we change it to parallel I literally knew it but I get nervous and stammer while answering.
- It was a very easy question I think marks wont be deducted.
- I learnt all about parallel and series as advised by professor.

Friday, November 15, 2024

- We are asked to decide on the final project and make the contract.
- Looks like we have a lot to do.

Monday, November 18, 2024

- I did some research on what options we have for the final project.
- Went through the kit and saw different types of sensors.
- I decided to make a temperature and motion sensor.

Tuesday, November 19, 2024

- I met Iddi in a class and explained him about the sensors .
- Then I thought making a game would be more interesting.
- We decided to go with a mini Mario game and LED buster game.
- We worked on making the contract.
- We decided to make the contract professional as we will have to make them in future profession.

Wednesday, November 20, 2024

- Got on discord call with my partner and completed the contract.
- Completed my journal and submitted it with W12 Deliverable(Contract).
- Noted down some doubts to ask professor about it
- Ordered I2c adapter as it is not in the kits.
