"PRESENTATION DAY"

- Today I went to the college early as it was our presentation day
- I was a bit nervous but it turns out we did a good job.
- The colour grading of our slideshow was awful Safat sir asked us to take care next time.
- I had back-to-back classes so I was tired and we did not code today.

Friday, September 20, 2024

- After attending my classes today I got on a call with Iddi
- We planned our next assignment which is focused on 'conio.h'.
- We have to create a marquee that changes directions when assigned keys are pressed.
- I have to test the code and Iddi will be adding functions to it.

Monday, September 23, 2024

- Today I had a lab and two quizzes
- Iddi and I discussed and divided the work after classes in the cafeteria
- We called in the evening and I decided on the colors of the presentation slides, I hope it looks good this time
- I did some introduction and objective slides along with him
- We did some work on the code and were able to complete it

- ➤ We added all the functions mentioned in the assignment to the code
- ➤ We forgot to add the sleep function then we had to modify the code again

Tuesday, September 24, 2024

- ➤ Today we decided to take a break and focus on another subject
- ➤ I completed all my other assignments today

Wednesday, September 25, 2025

- ➤ Today after class Iddi and I sat together and completed our presentation.
- ➤ We decided to divide the slides alternatively
- ➤ I ran the code again and again just to make sure
- ➤ The code stopped running and I was worried until I realized I forgot to add a semicolon
- ➤ We created a repository and added our professor to it over a call
- ➤ We finalized the script and rehearsed our presentation
